Identifizier und URL rewriting

Metadaten

- Transport Network
- Transport Network Air

class air transport

Network

**Common Transport Elements::
TransportNetwork**

```
+ inspireId: Identifier
+ typeOfTransport: TransportTypeValue
«voidable»
::Network
+ geographicalName: GeographicalName [0..*]
```

class air transport

Air Transport Network::AerodromeNode

```
::AirNode
+ significantPoint: Boolean
::Node
+ geometry: GM_Point
::NetworkElement
+ inspireId: Identifier [0..1]
«voidable»
+ designatorATA: CharacterString
+ locationIndicatorCAO: CharacterString
::TransportNode
+ validFrom: DateTime
+ validTo: DateTime [0..1]
::TransportObject
+ geographicalName: GeographicalName [0..1]
«lifeCycleInfo, voidable»
::NetworkElement
+ beginLifespanVersion: DateTime
+ endLifespanVersion: DateTime [0..1]
```

constraints

```
::TransportNode
{ All objects have inspireId }
```

class air transport

TransportProperty

Air Transport Network::AerodromeType

```
+ aerodromeType: AerodromeTypeValue
::NetworkProperty
+ inspireId: Identifier [0..1]
«voidable»
::TransportProperty
+ validFrom: DateTime
+ validTo: DateTime [0..1]
::NetworkProperty
+ networkRef: NetworkReference [1..*]
«voidable, lifeCycleInfo»
::NetworkProperty
+ beginLifespanVersion: DateTime
+ endLifespanVersion: DateTime [0..1]
```

constraints

```
{Applies to AerodromeNode and AerodromeArea only}
::TransportProperty
{ All objects have inspireId }
```
